

Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1.-4. (canceled).

5. (previously presented): A video distribution system for distributing a video through a network to a client terminal, comprising:

 a user information holding means that manages a plurality of user accounts and holds user information of each of the user accounts;

 a monitoring page transmitting means that transmits a web page to the client terminals, the web page including a display area and an operation area;

 a setting box transmitting means that transmits to the client terminals a setting box for setting a pattern of arrangement for displaying videos in the display area;

 an arrangement registering means that registers a plurality of patterns of videos for each user in the user information holding means, each pattern of videos registered being based on a corresponding notice from the client terminal;

 a list transmitting means that transmits a list of patterns of videos registered by a corresponding user to the client terminals; and

 a video distributing means, which for each client terminal, receives video distribution requests from the client terminal, each video distribution request indicating a corresponding one of the videos in a pattern of videos selected by the client terminal from the list of patterns of videos registered, and distributes to the client terminal the videos corresponding to the video distribution requests.

6. (currently amended): The video distribution system according to
~~claim 1~~claim 5,

wherein the pattern is a four-screen pattern,
wherein the setting box means receives a request for selecting a plurality of cameras, each of which picks up video displayed on each of an upper left screen, and upper right screen, a lower left screen and a lower right screen of the four screen pattern, and
wherein the list transmitting means transmits the patterns to the client terminals at the start of the monitoring page.

7. (currently amended): The video distribution system according to ~~claim 1~~claim 5, further comprising:

scan menu box transmitting means that transmits a scan menu box for setting automatic scanning of displaying the videos,
wherein the setting box means sets an identification number of the video displaying at each position in the displaying area, and sets at least either one of an identification number and an identification name of each pattern, and
wherein the scan menu box means selects the plural patterns using the identification number or the identification name.
